

## **A very grateful mom**

**After a blissful pregnancy, Juanita suffered complications during the delivery of her first child. Losing blood at a rapid pace, she was rushed into surgery where she was transfused with blood to replenish what she had lost. As a result, she was able to recover and soon focus on her beautiful new baby. But she has never forgotten the generosity of the blood donors who helped save her life. Today, Juanita is healthy and thankful that somewhere out there, strangers took time out of their busy lives to donate their blood and save her life. She is now the mother of two beautiful children and is forever thankful to her unknown heroes for the gift they gave to her and her family.**
